2025 Annual Report

À la poursuite de la robustesse de la résilience et de la magnificence

Tactical Portfolio Architecture

A disciplined approach grounded in Value, Macro, and Asymmetry

Strategic Structure

- **Goalkeeper** —IBKR (Custodian)
- **Defense ($\leq$ 20%)** —Cash & Equivalents
- **Midfield ($\leq$ 40%)** —NVDA, AVGO, MSFT, TSM, MAGS, QQQM-QDII, XLY-QDII
- **Attack (0–40%)** —TQQQ OTM LEAPS CALLS

Allocation Principle

The portfolio adopts a *Barbell Structure*:

- A defensive liquidity core ensuring systemic resilience;
- A central block invested in dominant enterprises and structural exposures;
- An offensive pocket with high convexity, activated exclusively during phases of extreme market fear.

Tactical Activation

Offensive exposure is not permanent. It is triggered only when multiple macro-financial conditions align:

1. A rapid spike in the VIX and implied volatility;
2. A sharp, reflexive correction in equity indices;
3. A manifest disconnect between market panic and long-term fundamentals;
4. A high probability of an asymmetric rebound in high-beta technology assets.
